

**WEST HIGHWAY 198 CORRIDOR CONCEPT MOVES FORWARD:** Visalia City Council and Planning Commission members approved a package of proposals which, in part, starts a process to preserve a “scenic corridor” for motorists entering Visalia from the west along Highway 198 and allows consideration of future land development opportunities in the areas on both sides of the corridor. With Vice Mayor Amy Shuklian dissenting, Council and Commission members authorized staff to proceed with incorporating the area referred to as the West Visalia Highway 198 corridor, from Goshen Avenue on the north to the Visalia Parkway extension on the south, into the General Plan update process. They also approved the following: A 200-foot setback area for properties currently within the City limits located on the north side of Highway 198, east of Shirk Street; Parks and Recreation Commission to study and make recommendations to the General Plan Update Review Committee on a detailed boundary area for the open space component of the Corridor for properties currently under County jurisdiction, and develop an open space corridor design for the setback area. Council members will consider authorizing the use of park impact fees to pay for design efforts and potentially hiring a landscape architect to assist in the design effort.

**OTHER NEWS:** The City Council and Planning Commission simplified the development process for the Business Research park zone, along Plaza Drive north of Highway 198.
