_	C3011	P C. O	0	

	al number of chairs					1
	Total number of chairs at which amalgam placement or removal occurs:					
	Narrative description (optional)					
	ion B cription of amalgam	separator or	r equivalent device			
	My facility has installed one or more ISO 11143 compliant amalgam separators (or equivalent devices) since June					
	My facility has one or more <i>existing</i> amalgam separators installed <i>prior to June 14, 2017</i> that capture amalgam containing waste from the above identified chairs (in Section A) where amalgam is placed or removed. I understand that the separator(s) must be replaced with one or more ISO 11143 compliant amalgam separators (or equivalent devices), after its lifetime has ended, and <i>no later than June 14, 2027</i> .					
Make			Model		Serial Number	Year of installation
☐ My facility operates an equivalent device.						
Make		- 1	Model	Average removal efficiency of equivalent device, as determined per 40 CFR 441.30(a)(2) (i- iii).	Serial Number	Year of installation

Section C

Design, Operation and Maintenance of Amalgam Separator/Equivalent Device

Please select and complete one of the following:

	The amalgam separator (or equivalent device) is designed and is operated and maintained to meet the requirements in §441.30 or a third-party service provider is under contract with this facility to ensure proper operation and maintenance in accordance with § 441.30 or § 441.40.
Prov	vide name & address of service provider:
	The amalgam separator (or equivalent device) is operated and maintained by the dental facility staff to meet the requirements in 40 CFR Part 441.30 or Part 441.40.
	vide a description of the practices employed by the dental facility to ensure the proper operation and intenance in accordance with 40 CFR Part 441.30 or 441.40:

Section D

Best Management Practices (BMP) Certifications

The above named dental discharger is implementing the following BMPs as specified in 40 CFR Part 441.30(b) or 40 CFR Part 441.40(b) and will continue to do so.

- Waste amalgam including, but not limited to, dental amalgam from chair-side traps, screens, vacuum pump filters, dental tools, cuspidors, or collection devices, is not discharged to a publicly owned treatment works (e.g., municipal sewage system).
- Dental unit water lines, chair-side traps, and vacuum lines that discharge amalgam process wastewater to a POTW must not be cleaned with oxidizing or acidic cleaners that may increase the leaching of solid mercury. Prohibited cleaners include but are not limited to: bleach, chlorine, iodine and peroxide that have a pH lower than 6.0 or greater than 8.0.

Section E

Recordkeeping and Record Retention

I have read and understand the Recordkeeping and Record Retention requirements for dischargers in 40 CFR Pat 441.50 (a) and (b).	or dental
